R Deepthi

Full Stack Web Developer

Professional Summary

Dynamic Full Stack Web Developer skilled in the MERN stack (React, Node.js, Express, MongoDB). Experienced in solo and collaborative projects, showcasing strong problem-solving abilities, teamwork, and attention to detail. Dedicated to building high-quality, responsive web applications.

Projects

VisionScript [Live Demo Link](#) [Github Repo Link](#)

JavaScript HTML5 CSS3

Responsive Web Design

- Integrated an interactive code editor with syntax-specific highlighting, allowing users to write, test, and debug code within the platform.enhancing readability.
- Developed an in-depth learning resource, guiding users through VisionScript’s syntax, data structures, and usage techniques.
- Implemented tools to instantly identify syntax errors, with real-time highlighting to improve coding accuracy and readability.
- Created specialized polyfills to add advanced features, ensuring consistent performance and enriching the language’s capabilities across different environments.

CoinEcho [Live Demo Link](#) [Github Repo Link](#)

HTML5 CSS3 Responsive Web Design

JavaScript

- Designed an introductory page showcasing the platform’s mission, popular cryptocurrencies, and user testimonials, with smooth scroll animations to enhance user engagement.
- Provided users with a dynamically updated list of cryptocurrencies, enabling efficient search and filtering for easy data retrieval.
- Offered comprehensive insights into each cryptocurrency, including historical price data, market cap, and other statistics, enhanced with visually engaging charts and trend graphs.
- Designed the platform to educate users about the cryptocurrency market and support informed decision-making.
- Ensured a seamless and accessible experience across devices, adapting all elements to different screen sizes for optimal usability.
